

Study program: Speech and Language Pathology, Special Education and Rehabilitation – Module Hearing Impairment			
Type and level of studies: Basic Academic			
Title of the subject: Linguistics			
Lecturer: doc. dr Maja Ivanović			
Course status: Obligatory			
ECTS: 7			
Prerequisites: None			
Aim: Course aim is to inform students on verified scientific facts which are concerned with nature and development of language as all humanity features, and especially with facts concerned with language structure and language function. The special aim is to enable students to gain knowledge about language and its structure that could be applied in diagnostics and treatment in speech pathology in language, both in habilitation and rehabilitation of deaf and near-deaf persons.			
Outcomes: Majoring this studies programme students will be theoretically and practically enabled to analyse language behavior in an individual. Gained knowledge about language will give students a necessary basis for outdoing and understanding expert studies programmes from speech therapy. Knowledge and skills in analyzing language phenomena will be applied in diagnostics and speech pathology and language treatment, both in habilitation and rehabilitation of deaf and near-deaf individuals.
